

ZOO

Zoo Tv is a traveling creative workshop for children and adults mixing puppets and video. He can create his puppet and make his cartoon in live.

WHY ZOO TV ?

An pedagogical workshop

Born from the overflowing imagination of Fabien Moretti (Atelier Zim, Cie La Mitaine) & Arnaud Cassone (Artcraft Visuals), Zoo Tv is the fruit of a collaboration combining their respective skills in a pedagogical and fun project.

The idea is to provide to childrens a free creative space, to discover the world of puppetry and video while allowing them to leave with their puppet and their video on social networks

ZOO TV WHAT IS IT ?

An interactive project

Zoo Tv is a project based on interactivity. The child has to create his own puppet, explore his creativity and, thanks to Fabien's experience, realize his idea in 5 minutes.

Then, he is directed to the video workshop, where Arnaud supports him and offers him a unique experience of live manipulation on a green background. He is led to develop his image conception creatively and to make a small cartoon of 30 seconds.

A PUPPET WORKSHOP?

A manual activity

Foam, fabric, wood, everything is done to realize the idea of the child. Fabien accompanies him from the beginning to the end of his creation and helps him to create an easily manipulated puppet.

The child will be able to leave with, and continue to have fun as much as he likes while developing his manual skills.

A VIDEO WORKSHOP?

Real time technology

The device allows to quickly understand the functioning of a green background and to have fun quickly thanks to the interactivity that allows the real-time technologies of inlay of special effects.

Several visual universes are proposed, in relation to the musical environment and the special effects, in order to allow the children to immerse themselves and to develop their sense of dramaturgy.

AND TECHNICALLY?

A mobile workshop

Zoo Tv is a mobile workshop, quick to assemble and disassemble, easy to implement in a variety of environments. Festivals, fairs, holiday center etc ... It requires a socket 16 amps and a minimum space of 6m x 3m.

It can be declined in several versions, from the discovery workshop to a more elaborate version, where the children will be brought to realize a small short film, from the creation of the characters to the scenography and the staging.
